# Ten Ways to Beat the Monster

Written by Dong Ruihan

ISBN:9787571406905  
Hardback:214\*214mm  
Price:¥39  
Publication Date:February, 2020  
World rights available  
3~6 Years

Available as an  
eBook

This is a picture book for health protection and prevention during the COVID-19 epidemic. When the virus swept across the town, the little girl fought against the virus with ten ways that her father (who is a doctor) taught her. Who won in the end? This book helps children learn protection knowledge in childlike language and inspires children to carry out protection work actively with their family.

## AUTHOR INTRODUCTION

**Dong Ruihan** is a painter, full-time mother, and lives in a doctor's family. Many of her picture books have been published. She draws illustrations for many books and finds painting inspiration in her daily parenting life.

# Mom Is Gonna Beat the Monster

Written by Diguagua Planet

ISBN:9787571406882

Hardback:214\*214mm

Price:¥39

Publication Date:February, 2020

World rights available

3~6 Years

Available as an  
eBook

On New Year's Eve in 2020, the little girl's mother could not accompany her to watch the China's CCTV Spring Festival Gala as she was going to beat the monsters. This mother was a doctor, and the monster she was to beat was the COVID-19. This book depicts the stories of countless ordinary people who stood fast to their posts and bravely fight against the pandemic.

## AUTHOR INTRODUCTION

**Diguagua Planet** is an innovative planet belonging to children in the future and dedicates to promoting "future education" and sharing high-quality education resources. We are convinced that future belongs to those children who have inner

# I Love Sports

# The Temple of Heaven

Written by Cui Yanbin

ISBN:9787530498071

Hardback:250\*250mm

Price:¥42

Publication Date:January,2019

World rights available

3~6 Years

Available as an  
eBook

By reproducing the construction scene of Hall of Prayer for Good Harvests in the Temple of Heaven, the book makes kids appreciate the culture of the Temple of Heaven, and thus reveals to them the amazing wisdom of the ancients. The book was examined and revised by Liu Diyu, associate professor of Department of Architecture, Tongji University.

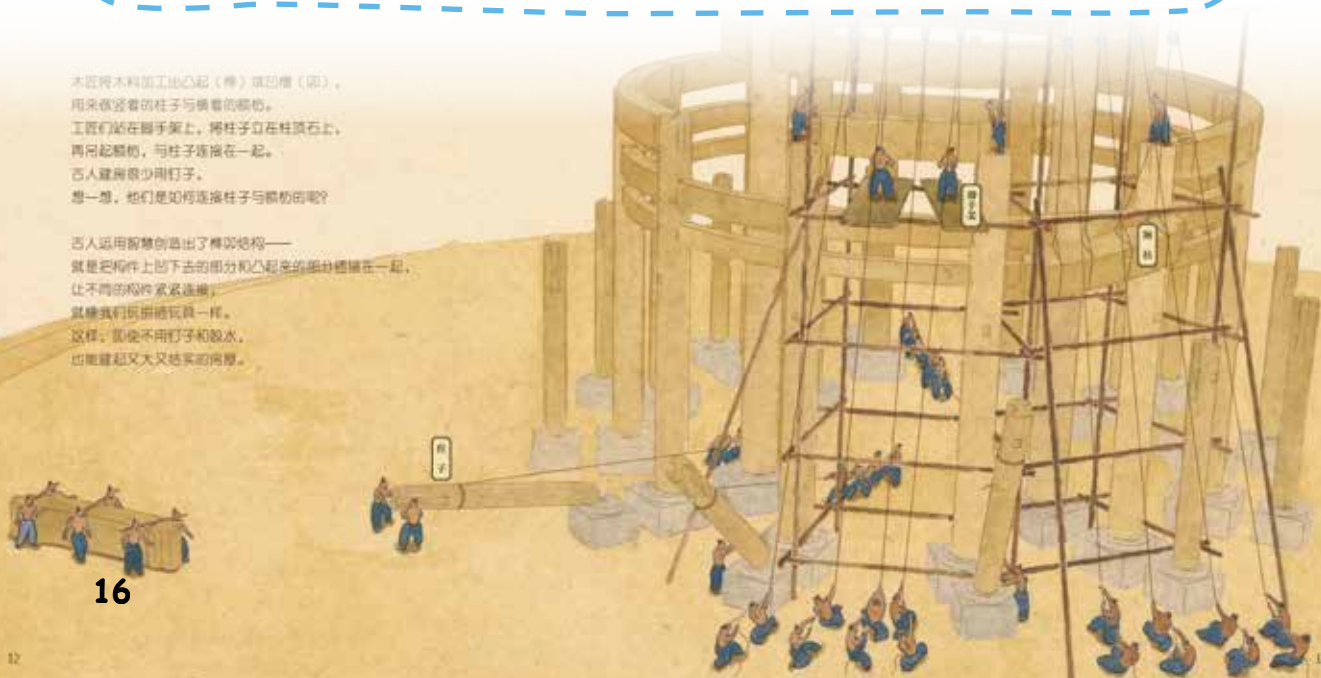

## AUTHOR INTRODUCTION

**Cui Yanbin**, a young painter, graduated from Central Academy of Fine Arts. For many years, he has been fascinated by the beauty of ancient Chinese architecture, and has been determined to reproduce ancient architectural techniques with modern artistic techniques. In order to create this book, the author collected and searched a large number of ancient documents, and used modern three-dimensional technology to make restoration models, painted by hand, and spent three years all together, in an effort to present our ancient culture to today's little readers perfectly.

木匠将木料加工出凸起（榫）或凹槽（卯），  
用来嵌接着柱子与横着的梁枋。  
工匠们站在脚手架上，将柱子立在柱顶石上，  
再吊起梁枋，与柱子连接在一起。  
古人建房屋少用钉子，  
想一想，他们是如何连接柱子与梁枋的呢？

古人运用智慧创造出了榫卯结构——  
就是把构件上凹下去的部分和凸起的部分榫紧在一起，  
让不同的构件紧紧连接，  
就像我们玩拼图玩具一样，  
这样，即使不用钉子和胶水，  
也能建起又大又结实的房屋。

# The Great Wall

Available as an  
eBook

Geography brings children a wide range of knowledge in space. This set of books presents the interesting insights, sceneries and customs of the world to the children from the unique perspective of Hillier, a senior traveller. In this book, the author first goes up hundreds of kilometers to the outer space with children, observes the earth in which people have always lived as a whole, and help children gain an overall sense of the earth and geography. Then comes a trip around the world to see the most interesting cultural buildings and natural wonders in different countries and regions. During this trip, the author takes the children to learn many European countries and experiences their customs.

## AUTHOR INTRODUCTION

**Hillyer (V.M. Hillyer)**, born in Weymouth, Massachusetts, was an outstanding American educator. He devoted his life to elementary and middle school education, loved history and art, and enjoyed traveling. After graduating from Harvard University with an undergraduate degree, he taught at Browning School in New York for two years, then moved to Baltimore and became the first principal of Calwater School. Hillier created the primary homeschool education system, the "Carlwater School System", which benefits the children of government employees, consuls, officers, and missionaries around the world.

eBook

This is a set of books about cities in China for children, with selected 6 major cities, including Beijing, Shanghai, Hong Kong, Xi'an, Chengdu and Xiamen. Located in different parts of China, they have important political and economic status, but more importantly, they boast historical culture of different historical periods. They are not only typical examples of urban development but also worth traveling.

## Created by team of famous schools

The College of Architecture and Urban Planning of Tongji University has three national first-class disciplines as architecture, urban and rural planning, and landscape architecture, all of which have been selected into the national construction list of "World-class Disciplines". The college ranks the 18th for "architecture and built environment" in the QS World University by Subject. For decades, it has been dedicated to the development of high-level specialists in architecture, planning and landscape. The series are compiled for the sake of providing children with a window of knowledge to learn and understand the city, so that more children will be fond of the city, architecture, landscape.

## authoritative recommended

Zheng Shiling, academician of Chinese Academy of Sciences and professor of Tongji University  
Wang Jianguo, academician of Chinese Academy of Engineering and professor of Southeast University,  
Dong Liming, professor of College of Urban and Environmental Sciences at Peking University

## Well-selected materials to show you the charm of Chinese cities

Six major cities as Beijing, Shanghai, Xi'an, Chengdu, Xiamen and Hong Kong are selected in the series of books. Located in different orientations of China, they have important political and economic status, and more importantly, boast various climates and cultural characteristics through the precipitation of history and culture in different periods. They have high tourism value and different models of urban development. The series can not only meet the tourism needs of parents and children, but also guide children to learn about the city in a deeper way.

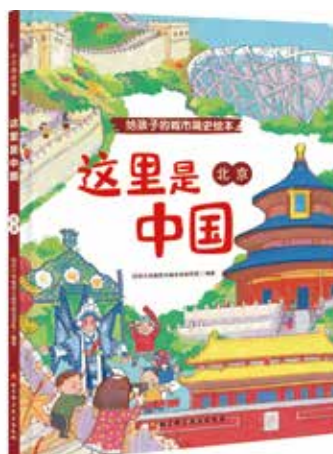

Interpretation from eight parts as tales of the city, historical origin, scenic spots, celebrities and masterworks, local customs, delicacy, transportation system, and municipal facilities provide readers with full understanding of the city.

Nearly 200 hand-painted illustrations restore the real feature of the city, with subtle blend of knowledge, artistry and readability.
