

About Us

Brand Story

Little Newton Science Education Co. currently publishes and oversees numerous different brands of books such as: Newton Magazine, Little Newton Magazine, Little Newton for Kids and Toddlers, and so forth. We also additionally publish comics, children's books, documentaries, and other scientific and historical products.

Original Intention

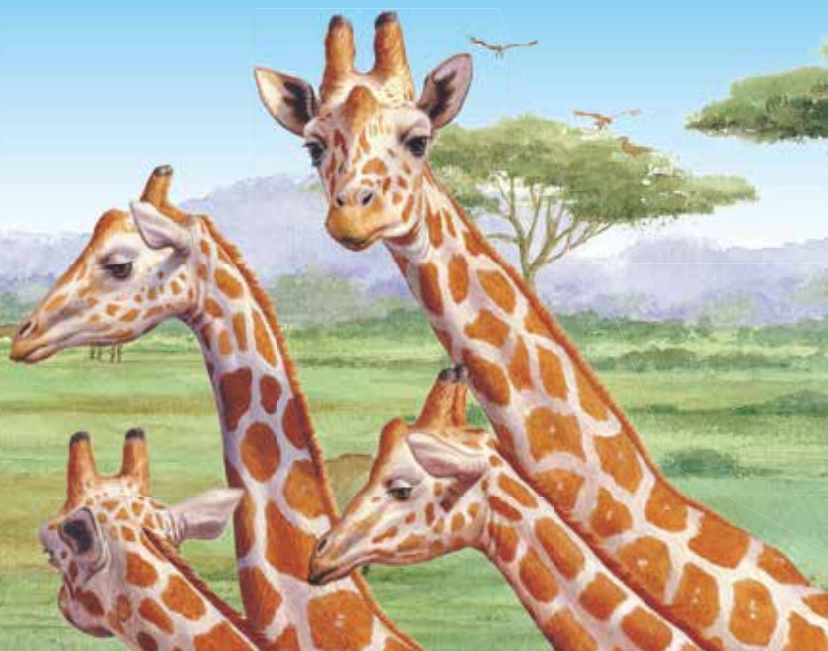

- Focus on people and joyful learning!
- Break the boring layout of traditional textbooks.
- Double the learning pleasure.

History

- Began publication of "Newton Magazine" in 1983, "Little Newton Magazine" in 1984, and "Little Newton for Kids and Toddlers" in 1990.
- More than a hundred million dollars were spent, creating over 2,000 best seller publications.

Awards

Proudly received more than 30 science awards.

Taiwan's Global Health Initiative in Malawi - the path from scratch

從無到有：臺灣在馬拉威的全球衛生實踐

1 Volume / 184 pages / 19x22 cm / for ages 10+

Over the past two decades, more than 30 faculty and students from National Taiwan University have been engaged in global health work in Malawi on the African continent to improve local health care standards, improve people's lives, extend life spans, and bridge health inequalities. This book records their efforts in Malawi, together with local public health partners, to prevent diseases, promote health, improve sanitation, increase educational opportunities, and pursue sustainable development for the people of Malawi. From this book, we can see every bit of their public health activities in Malawi and the enthusiasm, fraternity, perseverance and wisdom of this group of Taiwanese youth. In an increasingly divided world, this book offers a glimmer of hope that by working together young people can still change the world.

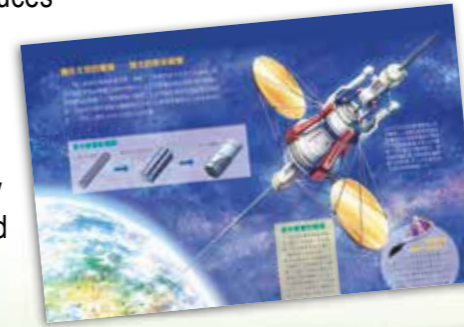

Cool Technology

+EBook

圖解酷科技

10 Volumes / 5 videos per volume / 72 pages / 18.5x26 cm / for aged 10-15 years old

This series of books introduces new scientific knowledge and technologies with easy-to-understand text and through a large number of pictures, readers can easily understand these advanced technologies.

The Scientific Little Chef

科學小廚師

4 Volumes / 112 pages / 19x25 cm / for aged 10-15 years old

The series contains 48 delicious dishes. Each dish starts with an interesting cartoon and the recipes are drawn with clear illustrations so that children can learn the cooking easily. It further enables children to understand Chinese and Western cooking methods, understand the nutrients in ingredients, and enrich children's cooking knowledge. Moreover, each dish contains scientific principles and is presented to readers in an easy-to-understand manner through detailed illustrations.

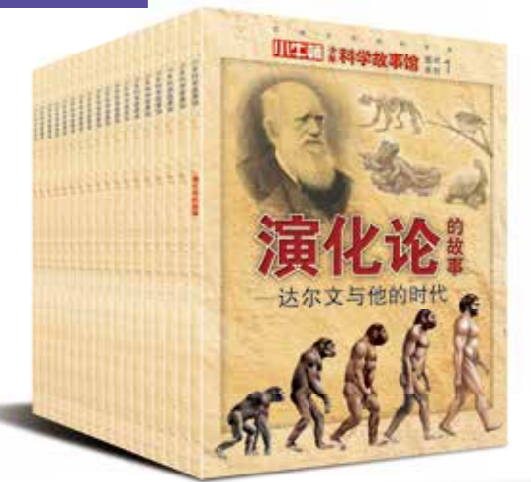

Little Newton Science Stories Collection

小牛頓科學故事館

18 Volumes / 80 pages / 18.8x26 cm / for aged 10-15 years old

With a narrative style in vivid and interesting stories, this series of books help us to outline the time and space background of important scientific discoveries or inventions. When teenagers carefully read the books, they can think about the thinking context at that time. This helps them learn more about the scientists we knew, their times, and how their scientific theories were built bit by bit.

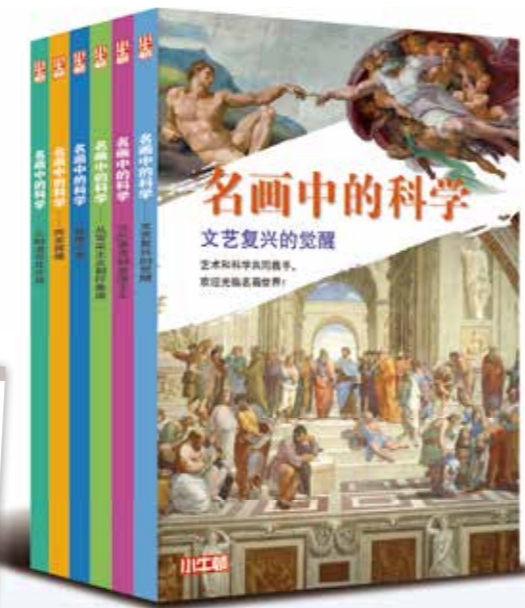

The Science in Famous Paintings

名畫中的科學

6 Volumes / 3 videos per volume / 110 pages / 21x28 cm / for aged 10 years old or above

The series combines aesthetics and science to let children have a liberal knowledge horizon, including 72 famous western and Chinese painters, with 600 famous paintings as the theme, each article from the painter and science, layer by layer to unlock the secrets of famous paintings.

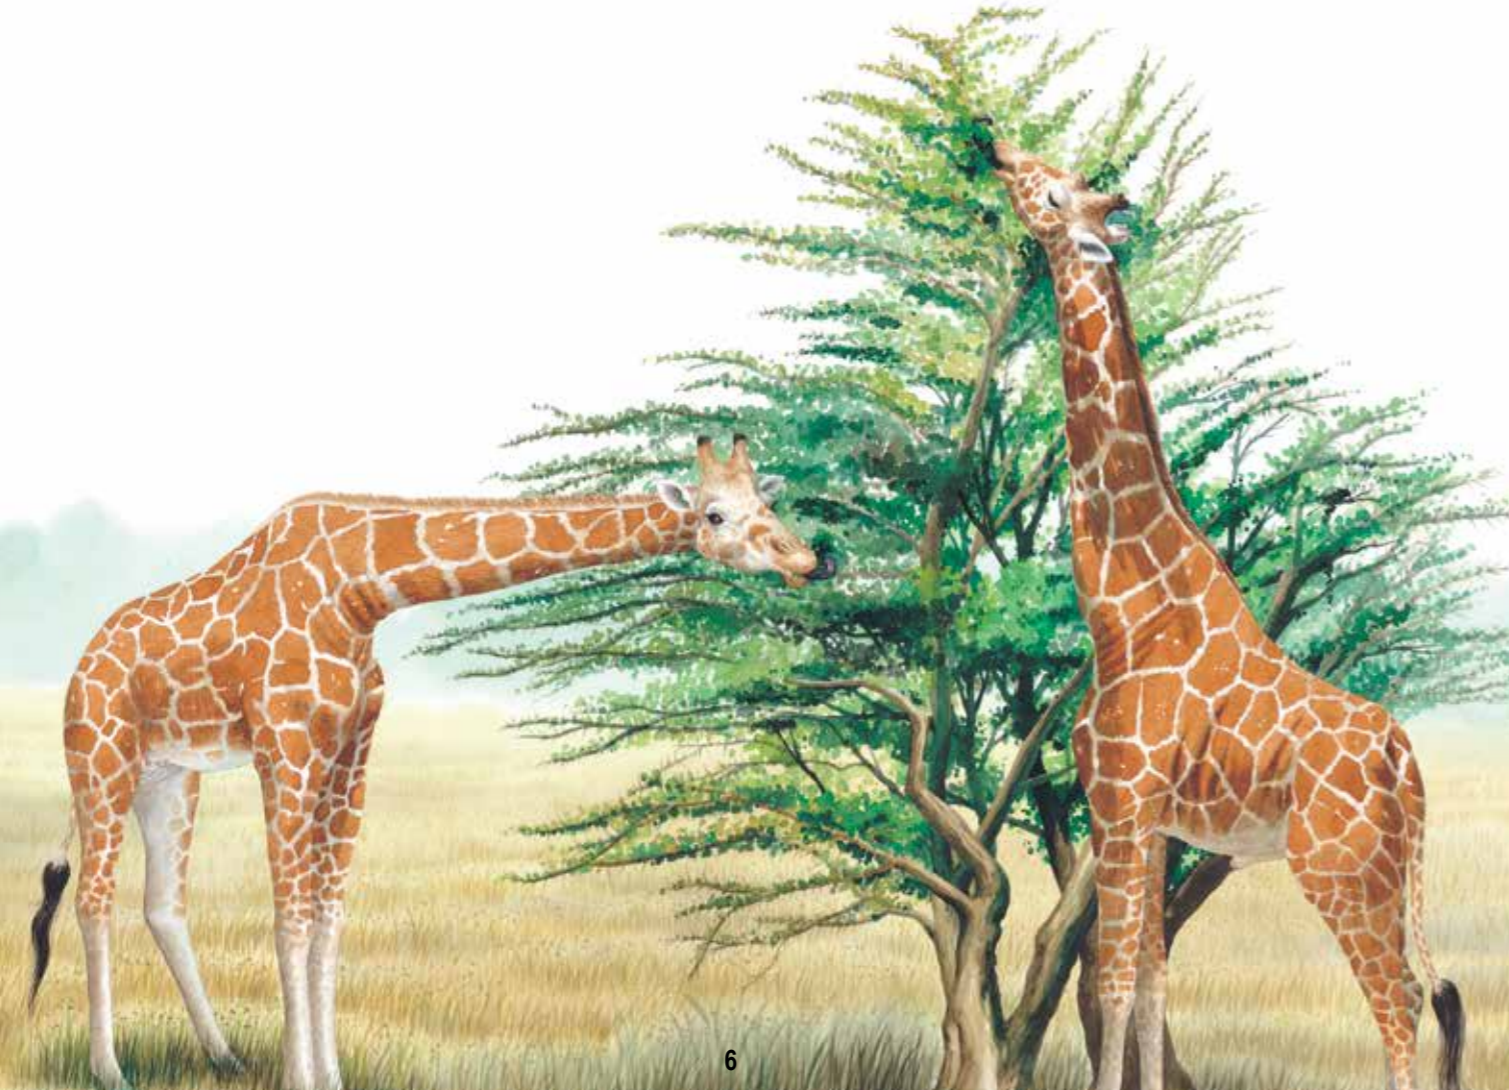

STEM Scientists

STEM 科學家

20 Volumes / 6 videos per volume / 80 pages/ 17x24 cm / for aged 8-15 years old

The "STEM Scientists" series of books focuses on experiments, explains the scientific principles behind them, and extends to technological applications and mathematical concepts. This series of books has four major themes: "Wonderful Changes", "Weather and Environment", "Light, Electricity and Sound" and "Life Science", with a total of 120 interesting experiments. At the same time, each small experiment is paired with an experimental video, leading children step by step into a new horizon of scientific learning.

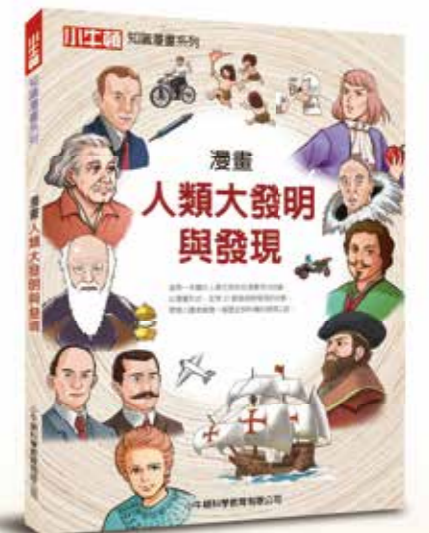

Comic Great Inventions

漫畫人類大發明與發現

1 volume/ 160pages/18.9x25.6cm/for aged 8-12 years old

From daily objects such as pencils to great inventions such as rockets, there are scientific principles revealed by scientists' efforts, as well as heroic adventure stories of explorers. In the 33 vivid comic stories, a wealth of information is integrated, allowing young readers to easily learn knowledge in various fields!

Inventions that Changed History

改變歷史的大發明

8 Volumes / 10 videos per volume / 88 pages / 18.5x23.5 cm / for aged 8-12 years old

Through 80 major inventions in human history, science knowledge is transmitted through rich scientific pictures and diagrams, and children are allowed to operate and experiment with their own hands to learn how to explore the world with the methods of scientists. Just like STEAM's original spirit, it fosters children's creativity and problem-solving ability.

A Journey of Plant Discovery for Children

寫給孩子的植物發現之旅

4 volumes/ 112pages/21x28cm/for aged 8-12 years old

After the "Age of Discovery" in Europe, some ordinary plants such as spices, tobacco, cotton, tea, rubber trees, etc., have become extremely precious, and the fate of the region involved has also completely changed.

Through a lively and interesting story, This series "A Journey of Plant Discovery for Children" leads readers to learn about spices (pepper, cinnamon, cardamom, etc.), golden plants (cotton, rubber, poppy, tobacco, etc.) , beverages (coffee, tea, wine) and horticultural plants. Readers can see how these plants play a key and important role in human life. Come on a journey of plant discovery through historical time and space!

Scientist's Top Duel

科學家的頂尖對決

5 volumes/64pages/ 21x28 cm/for 8-12 years old

Being different from the general biographies of celebrities, this series breaks out of the writing framework of personal records. it focuses on describing the interaction between multiple scientists. Academic communicating, grievances and hatreds are on paper. The history of science development is no longer like working behind closed doors, it also adds a more human touch.

In addition, starting from the stories of scientists, a more in-depth introduction to scientific celebrities, with detailed graphic explanations, readers can learn much more relevant scientific knowledge and understand the history of scientific development.

Cool Science Around -A brief History of Things in Life

生活萬物極簡史

3 volumes / 84pages / 21x27.5cm /for aged 8-12 years old

In daily life, many objects have their special functions. They help us solve various problems in life and make our lives more convenient and comfortable. We might not have thought that they have become what they are now after many inventors have worked on it and improved it constantly. Moreover, in order to help people live more comfortably, their appearance is still evolving. This series of books leads children to explore the origins of various small objects in daily life, and the evolution of these inventions. It also introduces the related scientific principles and knowledge involved. By Interesting and vivid narratives, with characteristic illustrations and pictures, it makes it easy for children to learn scientific knowledge from the little things around them. There are 3 volumes in this series.

The Science in Chinese Poetry

詩詞中的科學

6 volumes / 78 pages / 21.5x22.8cm / for aged 8-12 years old

Each volume selects 15 poems from classical Chinese literature, including Tang poetry and Song lyrics, accompanied by explanations of the poems and discussions on scientific concepts in zoology, botany, astronomy, and earth sciences.

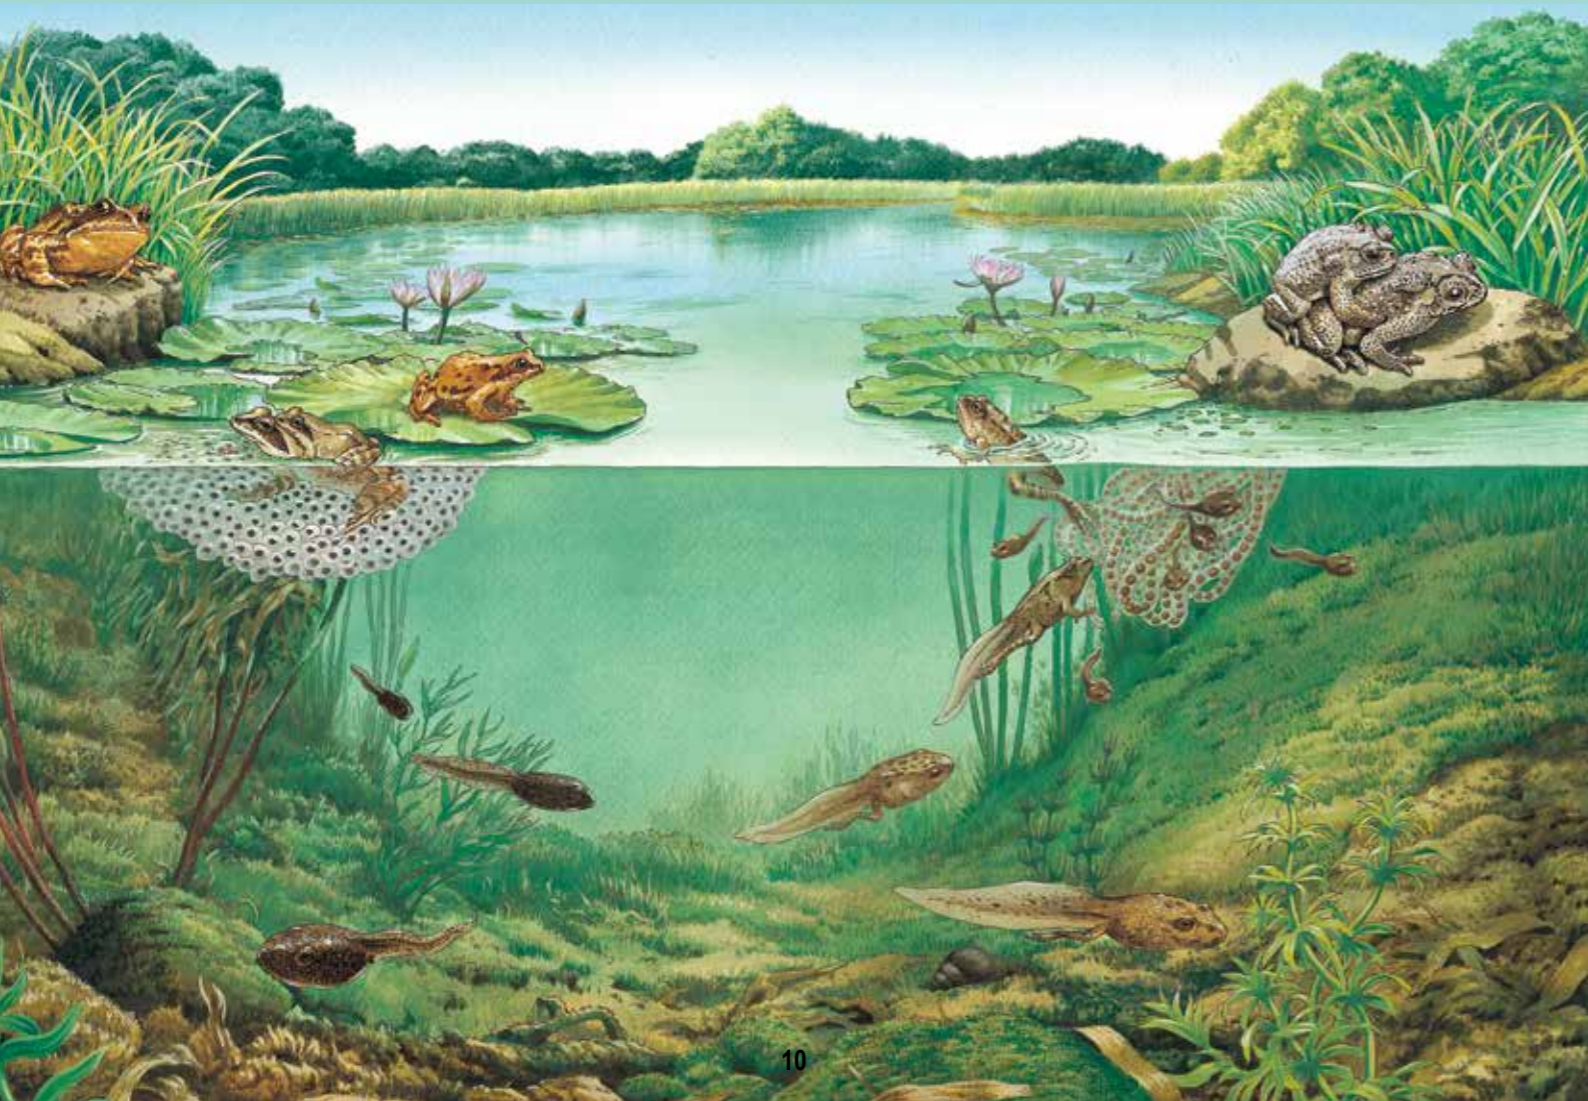

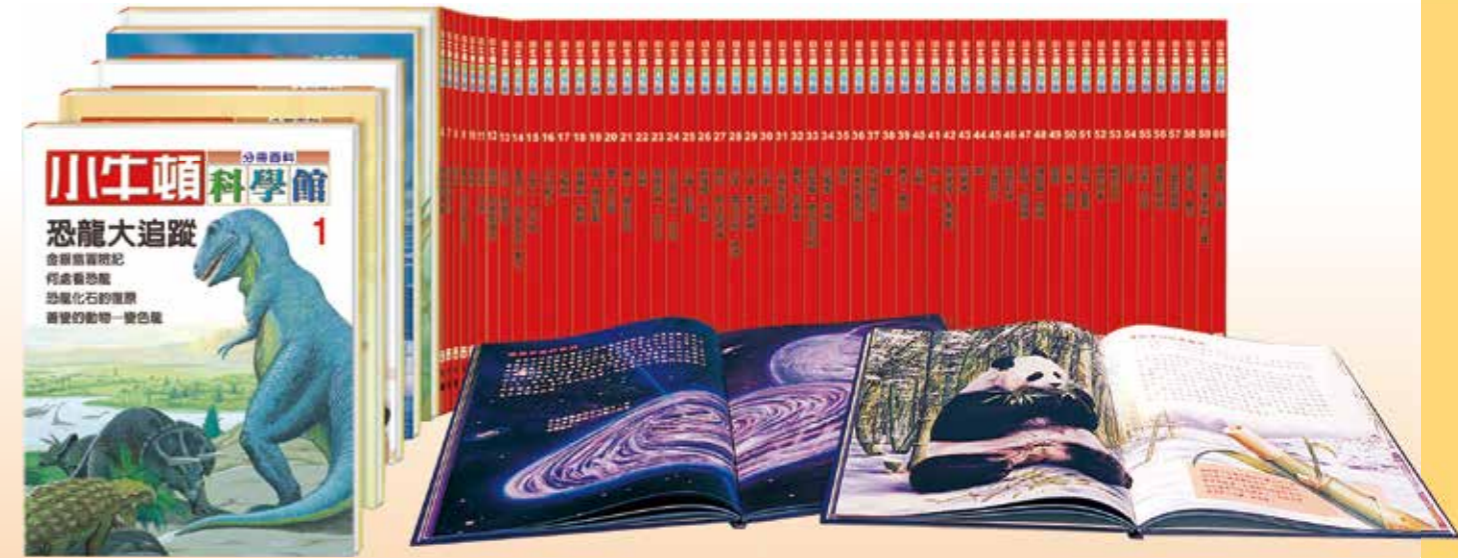

Little Newton Science Museum

+EBook

小牛頓科學館
