WHY Evan-Moor?

Evan-Moor has been providing high-quality, creative, and engaging PreK–8 materials for teachers and parents since 1979. Every year, we develop and publish new titles with all-new content to meet the needs of students around the world.

Our mission is helping children learn, and we do this by providing teachers and parents with the resources they need to cultivate a love of teaching and learning.

Our materials:

- Include award-winning content.
- Are created by highly experienced educators.
- Are aligned with current standards and best educational practices.
- Are designed to build and reinforce complex skills.
- Contain clear, direct, easy-to-implement lessons that enrich and enhance any curriculum.
- Support the varied learning levels and styles of today's students.
- Are ideal for formative assessments and test preparation.
- Inspire children to learn!

Evan-Moor Educational Publishers The Finest Educational Materials in the World!

Give Early Learners a **SMART START!**

Smart Start: STEM

Fun hands-on projects develop early learners' critical thinking skills!

Grades PreK–1 Hands-on STEM activities encourage young children to think creatively and explore different ideas to solve problems.

- Each unit includes stories and activities that help children understand a science concept and complete the STEM challenge.
- A STEM journal activity helps guide children through the engineering design process: plan, create, test, and record.
- Topics target earth, life, and physical science.

128 full-color pages.

Smart Start: Read & Write

Alphabet stories with an audio option and fun activities motivate children to read and write!

Grades PreK–1 Age-appropriate reading and writing activities help children practice the essential steps to becoming strong readers and writers.

- Stories with an audio read-aloud option
- Colorful activities to apply listening, writing, and speaking skills
- Review activities to show understanding

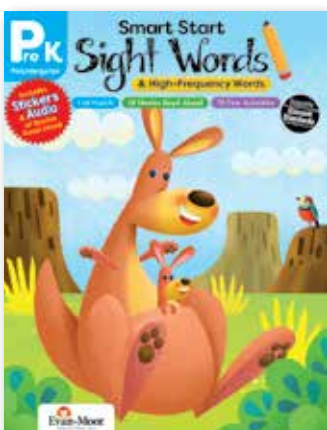

Includes reward stickers, answer key, and audio stories.

128 full-color pages.

Smart Start: Sight Words & High-Frequency Words

Accelerate children's reading skills by helping them learn to read sight words and high-frequency words!

Grades PreK–1 Each full-color activity book guides young children in practicing and learning 120 sight words and high-frequency words. The ability to read sight words and high-frequency words is necessary for fluent reading and is one of the most important components of language learning! The carefully controlled vocabulary in each unit, engaging practice activities, word-list sliders, and stories with read-alouds all help children become readers and improve fluency.

- Over 70 colorful activities engage children in learning to read words.
- 18 stories with an audio read-aloud model reading fluency.
- Word-list sliders provide a tool to help children review words at any time.

Includes reward stickers, answer key, and audio stories.

128 full-color pages.

Top Student

Provide children a path to academic success!

Grades PreK–6 *Top Student* provides hundreds of fun activities and practice pages to keep children challenged and excited as they strengthen their skills across all curriculum areas.

Top Student activities provide practice of the most important skills for each grade level, as well as opportunities for critical thinking and creativity.

Core subject areas and topics include:

- Grammar and punctuation
- Spelling and vocabulary
- Reading
- Writing
- Math
- Computer science
- Science
- STEM
- Social studies
- Social and emotional learning

These robust workbooks also include:

- Reward stickers (grades PreK–3)
- Informational posters
- Meditation activities with corresponding meditation audio available via a QR code

Skill Sharpeners: Spell and Write

Meaningful spelling and writing practice is perfect for English language learners and advancing skills!

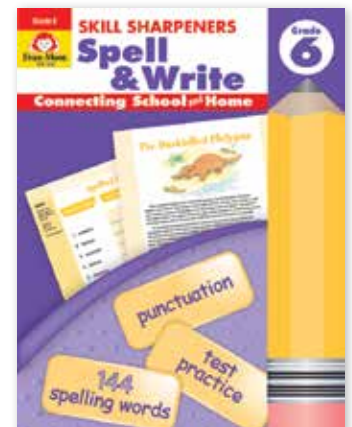

Grades PreK–6 Provide your students with full-color spelling and writing activities that are ideal for at-home practice. Twelve comprehensive units feature a story or article, a spelling list, spelling activities, grammar and punctuation exercises, writing skills, and a test in multiple-choice format. The PreK title contains 26 units, one for each letter of the alphabet. Each unit in the kindergarten title is built around a short-vowel word family.

Includes a downloadable Teaching Guide. 144 full-color pages.

Daily Reading Comprehension

Improve students' reading comprehension and test scores with an easy-to-use format!

Grades 1–8 • 30 weeks • 10- to 15-minute lessons

Daily Reading Comprehension has been a classroom favorite for providing daily instruction of reading strategies and comprehension skills that students need to become strong and successful readers. In the 30 weeks of daily practice activities, students are asked to apply reading skills and strategies to 150 fiction and nonfiction passages.

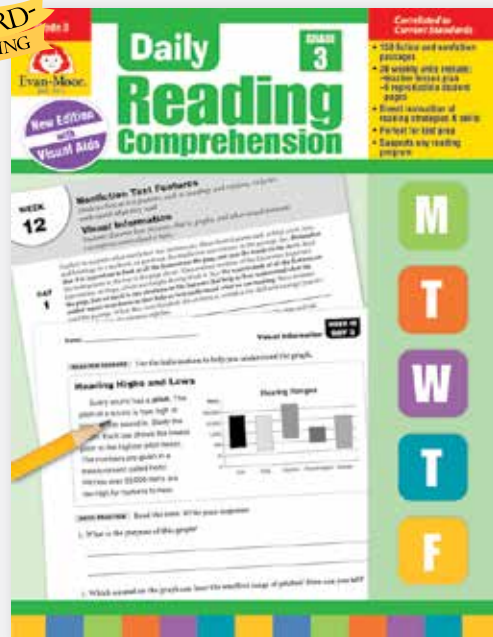

What's new in the revised edition?

Grades 1–2: These titles include new visual aid pages to help students apply reading skills and strategies to daily passages. The content is the same.

Grades 3–8: These titles include visual aid pages and all-new constructed response questions, replacing the multiple choice format. The reading selections are the same.

Use this series with *Reading Comprehension Fundamentals* for a powerful teaching duo. Engage your students in reading, thinking about, and responding to a variety of passages and texts.

208 reproducible pages.

Reading Comprehension Fundamentals

Help students improve their reading comprehension with this focused approach!

Grades 1–6 *Reading Comprehension Fundamentals* provides you tools to target reading skills and strategies with which students need the most help. The series includes fiction and nonfiction texts to provide students ample reading experiences. The comprehensive units develop a deep understanding of each skill and strategy introduced.

Each of the approximately 35 units focuses on one reading skill, strategy, text structure, or genre, such as:

- Main Idea and Details
- Compare and Contrast
- Making Inferences
- Cause and Effect
- Author's Purpose

Each unit includes a review page for students to show understanding.

This series complements the skills and strategies practiced in *Daily Reading Comprehension!*

176 reproducible pages.

Daily Word Problems

Students' problem-solving skills improve day by day as they take part in meaningful, real-life math practice!

Grades 1–6 Completely revised, *Daily Word Problems* is the perfect resource to improve students' problem-solving skills. The all-new word problems are written to support current math standards and provide consistent spiral review of math concepts.

- 36 weeks of activities give practice of grade-level math concepts such as addition, multiplication, fractions, logic, algebra, and more.
- Monday through Thursday's activities present a one- or two-step word problem, while Friday's format is more extensive and requires multiple steps.
- The multi-step problems require students to incorporate higher-order thinking skills.
- A new day-by-day skills list helps teachers identify skills practiced.

128 reproducible pages.

Math Fundamentals

See math and problem-solving skills improve!

Grades 1–6

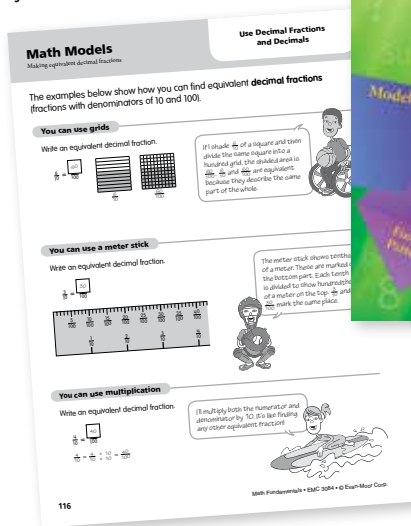

The math models and problem-solving templates in this book will guide your students through successfully analyzing and solving grade-level math problems. And the math models are also helpful to parents.

Each unit focuses on a cluster of the standards, so it's easy to target your instruction. The mathematical practices and standards are included for each unit for easy reference.

Math Fundamentals is a comprehensive resource that can be used:

- As a core math curriculum to teach grade-level skills and strategies for solving problems
- To review math skills and provide additional practice
- To remediate and target instruction for struggling students

Skill Sharpeners: STEAM

NEW
Full Color

Engage children in solving real-world problems with an integrated approach to learning!

Grades PreK–6 STEAM is an approach to learning that uses Science, Technology, Engineering, the Arts, and Mathematics to engage children in empathizing, thinking critically, applying knowledge, and coming up with solutions to solve real-world problems. Each unit presents a real-world problem in a realistic fiction story followed by an informational text, written and hands-on activities, and a STEAM task. Integrated learning focuses on:

- **Science:** Concepts related to the unit's topic
- **Technology:** Real-world applications of technology
- **Engineering:** Examples of engineering solutions
- **Art:** Creative solutions through art projects
- **Math:** Math operations to figure out solutions

Plus, each title includes a downloadable Teaching Guide! 144 full-color pages.

Science Lessons and Investigations

Build strong science foundations!

Grades 1–6

This robust teaching resource presents science learning through in-depth investigation and observation, supporting Next Generation Science Standards (NGSS).

Science units build upon prior knowledge and experience and allow students to apply their understanding in a creative way. Each unit guides students through exploring the science concept and includes hands-on activities to extend learning.

Each grade level contains 12–14 units that include:

- Teacher support and concept overview page
- Vocabulary/words to know
- Reading selections with real-life visual examples
- Comprehension activities

- Writing activity
- Hands-on science investigation*

* Includes experiments, STEM challenges, observations, or art projects!

224 reproducible pages.

What Do Plants Need to Grow?

Complete the items.

1. What would happen if these plants got sunlight but no water?

2. Draw a picture that tells about what you wrote.

What Plants Need Art Project

Materials:

- pages 24 and 25
- blue construction paper
- brown construction paper
- markers or crayons
- scissors
- white paper, cut into wide strips
- glue
- tape

Here's how:

- Reproduce and distribute the templates on pages 24 and 25 to each student.
- Distribute construction paper, markers or crayons, scissors, and glue to students.
- Explain to students that they will make a picture that shows what a flower needs to grow.
- Have students tear the brown paper and glue it to the bottom of the blue paper. This is the soil.
- Then have students color, cut out, and glue the plant parts and sun pictures to the blue paper.
- Next, have students choose the water picture they'd like to use and color, cut it out, and glue it to the blue paper. Invite students to add details to the picture if they wish to.
- After students complete the project, distribute a white paper strip and a pencil to each student. Then have students write a sentence that tells what their picture shows. Tape the sentence to the bottom or top of the picture.

Plants have **needs**. They need light and water to grow. A lot of plants **grow** outside. The light these plants need comes from the sun. The water these plants need is rain. Plants grow when they get enough sunlight and rain.

Plants do not grow if they do not get the water they need. Sometimes, it does not rain every day. People can help by giving plants water. They can use a watering can or a hose.

Stegosaurus

Daily Science

Based on National Science Standards for life, earth, and physical sciences.

Grades 1–6

- Why do camels have humps? How far up does the sky reach? Where do echoes come from? These are just some of the motivating questions your students will answer while they investigate scientific concepts.
- Thirty weeks of 10- to 15-minute lessons introduce students to standards-based science concepts while they find the answers to real-life questions about the world around them.
- Inquiry-based lessons develop science literacy and encourage critical thinking.

192 reproducible pages.

Daily Higher-Order Thinking

U.S. \$21.99

Teacher's Edition
ISBN

Teach your students to be critical and creative thinkers in just 15 minutes a day!

Grades 1–6 The 30 weeks of engaging activities help to develop and grow students' problem-solving skills. Each full-page activity for Monday–Friday provides practice of a higher-order thinking skill in the context of a different curriculum area for authentic practice.

- Each activity focuses on a thinking skill stated as a behavioral verb such as *infer*, *illustrate*, *deduce*, or *evaluate*.
- Engaging formats include logic puzzles, creative writing, picture comparisons, and “what if” questions.
- An answer key provides sample responses for each day's activities.

Daily Higher-Order Thinking is a must-have resource that encourages students to use content as a tool to solve real-life problems, explore concepts, and think creatively!

176 reproducible pages.
